

Cal OES Daily Situation Report

October 25, 2015

This day in California History (2003): A signaling fire that would become the Cedar Incident, San Diego County, is lit by a hunter that became separated from his hunting partner. The Cedar Fire went on to become one of the largest wildfires in California recorded history burning 273,246 acres.

Cal OES
GOVERNOR'S OFFICE
OF EMERGENCY SERVICES

SITUATION SUMMARY

Tropical Depression Patricia, Central Mexico ([FINAL](#))

Cal OES

- CalOES has reached out to Mexican Officials to offer assistance if needed.
- Per the Cal OES Coastal Regional Administrator, San Francisco Mayor Ed Lee has asked that SF DEM reach out to our partners and let them know that San Francisco is willing to provide resources and support to the likely victims of Hurricane Patricia.

FEMA

- The FEMA National Response Coordination Staff has not been activated. Urban Search and Rescue Teams (VA TF-1 and CA TF-2) have been notified and are monitoring. There have been no requests for international assistance.
- The National Infrastructure Coordinating Center reports there are no known/reported impacts or threats to national critical infrastructure.

USAID

- There have been no requests for International Assistance.
- No Disaster declaration is expected at this time.

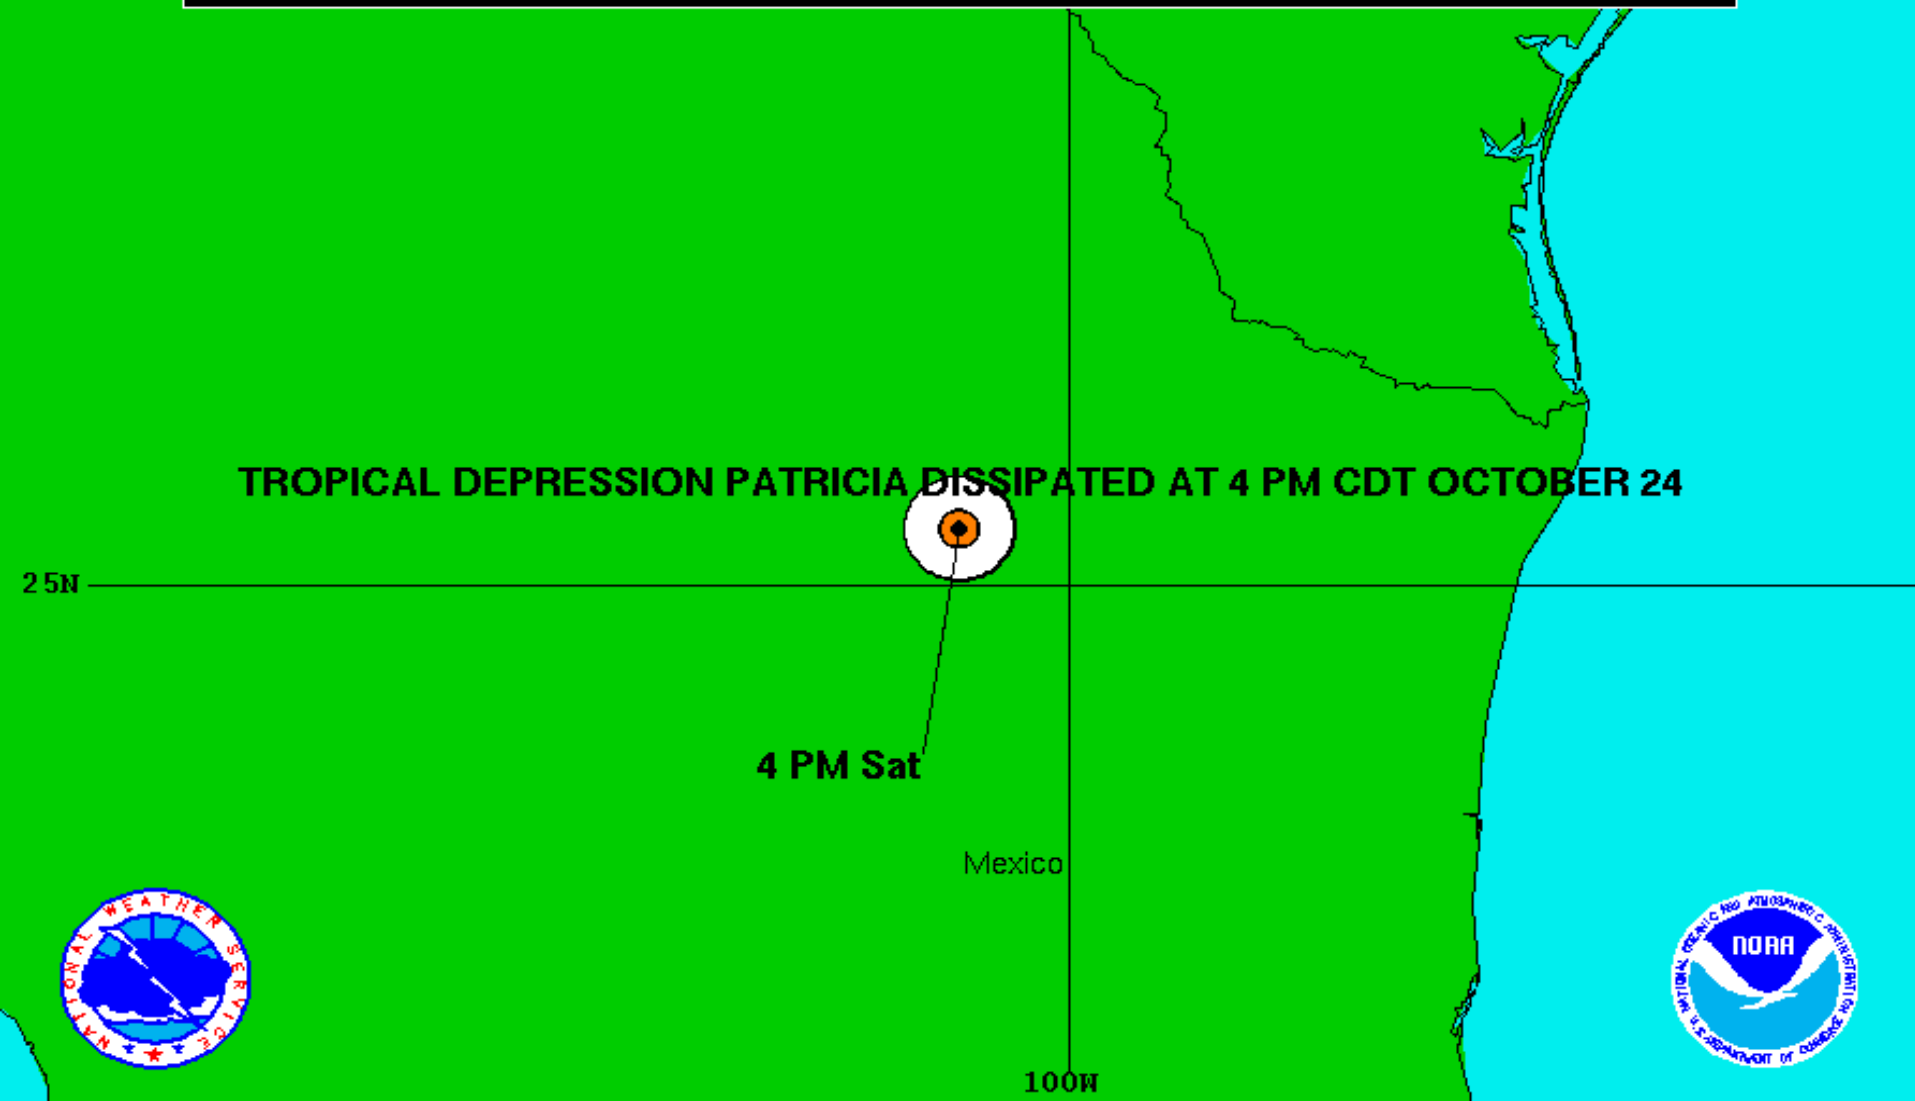

National Hurricane Center

- [Patricia has dissipated.](#)

[RAINFALL: While heavy rains near the center of Patricia have decreased significantly as the cyclone has weakened over northeastern Mexico, the heavy rain threat ahead of the remnants of Patricia will increase across northeast Mexico into coastal sections of Texas. This heavy rain threat will continue across the western Gulf coast through this weekend and spread into the central Gulf coast by early next week. These rains may produce dangerous flash floods.](#)

[As of 10/24/15 at 1400 hours, the National Hurricane Center has discontinued reporting on Patricia.](#)

Note: The cone contains the probable path of the storm center but does not show the size of the storm. Hazardous conditions can occur outside of the cone.

Center Location 25.3 N 100.6 W

Max Sustained Wind 30 mph

Movement NE at 22 mph

Forecast Positions:

 Tropical Cyclone  Post-Tropical

Sustained Winds: D < 39 mph

S 39-73 mph H 74-110 mph M > 110mph

Potential Track Area:

 Day 1-3  Day 4-5

Watches:

 Hurricane  Trop.Storm

Warnings:

 Hurricane  Trop.Storm

SITUATION SUMMARY

Kern County Storm Event Proclamation

- A Proclamation from Kern County has been received proclaiming the existence of a local emergency due to the storm event that occurred on 10/14/15 to 10/16/15.
- No mutual aid or State resources are requested at this time.

Cal OES Activation Status

- State Operations Center: Level 1
- Inland Region EOC: Level 1
- Coastal Region EOC: Level 1
- Southern Region EOC: Level 1

Antelope Valley, Vulnerable Water Systems

- The three most vulnerable systems (White Fence Water #3, Cal Water Leona Valley, and Landale Water) are currently working with partner agencies to supplement their current supplies through a combination of interties, wells, and some water hauling.
- The agencies are also working closely with DWR and SWRCB.
- DWR's estimate for completing all repairs to the State Water Project aqueduct is November 11th.
- There are no unmet needs or requests for assistance.

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

- Dry weather will continue through early next week except for a few light showers possible over the coastal range and northern mountains today. A stronger weather system looks to bring cooler temperatures with some precipitation across most of Interior Northern California midweek. Weak high pressure and offshore winds will continue to bring hot and dry conditions today across portions of Southern California.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwwa_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Rains will increase across much of the area today as a frontal system moves inland. Rains will taper off tonight but heavier rains are expected to return by Tuesday night as a stronger system impacts the area.

Medford Weather:

A cold front will push onshore around midday today but then it will weaken and lift north of the forecast area tonight into Monday. Post-frontal showers will end Monday morning and the remainder of Monday and Tuesday will be dry. A warm front will arrive Tuesday night, followed by a cold front Wednesday morning. Post-frontal showers will continue into Wednesday evening and then diminish as the upper trough departs the area.

Reno Weather:

Dry weather and above normal temperatures continue through Tuesday. Gusty winds are expected today, with choppy conditions on Lake Tahoe. Otherwise generally light winds are expected over the next few days. Low pressure will bring cooler conditions with possible light rain and high elevation snow showers Wednesday and Thursday.

San Francisco Weather:

Daytime temperatures will cool slightly today as a system passes north of the region. Aside from a slight chance of light rain over the far northern part of the North Bay today, dry conditions are expected to persist. The next Pacific system is forecast to arrive along the West Coast from Tuesday night into Wednesday and bring a chance of precipitation to much of the region.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

A weak weather system may bring a few light showers to the coastal range and northern interior mountains this afternoon into evening. A cooler and wetter weather system is possible later Tuesday into Thursday.

Hanford Weather:

Dry weather is expected across the central California interior through Tuesday. Afternoon temperatures will average above normal through the period. A storm system over the eastern Pacific will bring cooler temperatures and a chance of wet weather by the middle of next week.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

High pressure aloft will support warm conditions through Tuesday. Low pressure aloft Wednesday will introduce the slight chance of showers and cooler temperatures. A return to warmer weather is possible next weekend as potentially gusty offshore flow develops in the wake of the low pressure system.

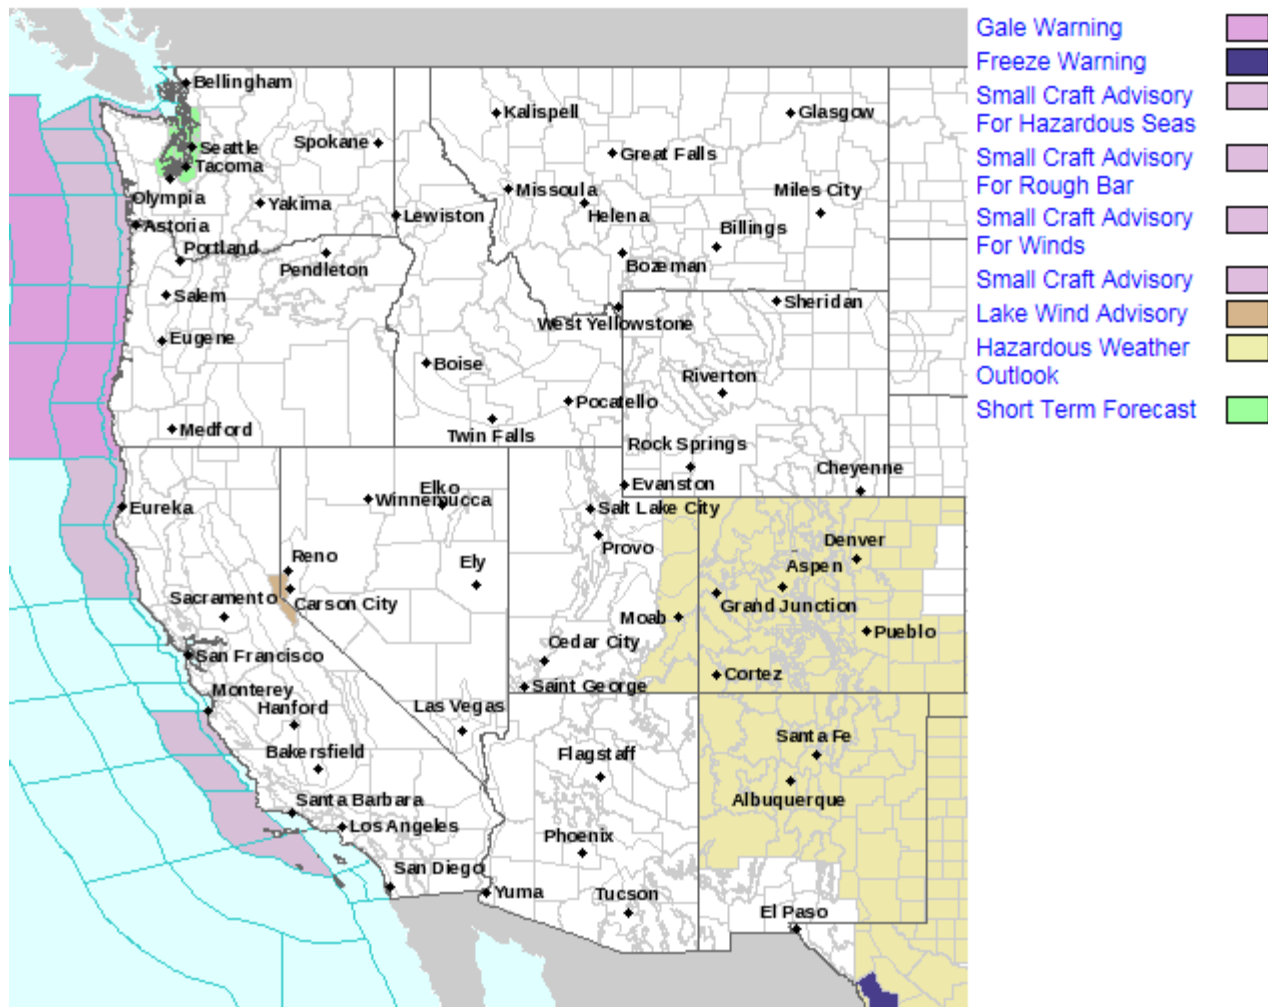

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

High pressure aloft and weakening offshore flow will bring high temperatures today similar to those of Saturday. A weak trough of low pressure moving inland through Southern California tonight will bring slight cooling near the coast Monday with slow cooling spreading inland on Tuesday. A trough of low pressure moving southward along the West Coast for Wednesday and Thursday will bring cooling to near seasonal levels with a chance of showers Wednesday night and Thursday. Dry weather with slow warming will follow for Friday through Sunday. Moderate to locally strong gusty north to northeast winds are possible below the Cajon Pass and in the Santa Ana Mountains and Foothills from late Friday into Saturday.

Southeast California Weather:

Dry conditions will continue across the region through the middle of next week, with little daytime temperature change. This will be followed by breezy and cooler weather Thursday and Friday as a new Pacific low pressure system moves into the region. Clearing skies are expected next weekend.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC every other Monday at 1100 hours.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

Local Emergency Proclamations:

A total of 62 local Emergency Proclamations have been received to date from city, county, and tribal governments, as well as special districts:

- 28 Counties: Butte, Colusa, El Dorado, Fresno, Glenn, Inyo, Humboldt, Kern, Kings, Lake, Madera, Mariposa, Merced, Modoc, Plumas, San Bernardino, San Joaquin, San Luis Obispo, Santa Barbara, Shasta, Siskiyou, Sonoma, Stanislaus, Sutter, Trinity, Tulare, Tuolumne, and Yuba.

CAL OES MISSIONS

On-Going Cal OES Missions

- **2015-LAW-19355, 10/22/15, 1300 hours**, Kern County Sheriff's Department requested 4 Human Remains Detection (HRD) dogs to assist in searching for a missing person in the Tehachapi Mountains on Saturday, 10/24/15. San Bernardino County Sheriff's Department is providing the requested resources for this search. **Mission On-Going**

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
